

# WE'RE HIRING

## Senior Angular Frontend Developer (m/f/d)

Invelop is a software company that invents and develops modern software solutions for our existing, large range of customers. We highly focus on customer value by creating world class software with progressive user experience for the German and European energy market and therefore support to manage the essential energy transition.

As a subsidiary of Bittner+Krull ([www.bittner-krull.de](http://www.bittner-krull.de)), a well-established software company, founded in 1988, we combine the best of two worlds: existing structures and proven methods and processes combined with the dynamics, progressiveness and agility of a start-up.

We are looking for highly motivated colleagues, who are interested in working with DevOps tooling (e. g. Terraform, Ansible, etc.), cloud-technologies (e. g. Kubernetes) and frameworks (.NET 5, Angular 11), shaping the company, working together with a team in Munich and creating modern software for our clients.

### TASKS

- You'll work in a highly motivated team with product owners and UX designers in Munich
- You'll work within flat structures, close to the founder of the company
- You'll be given responsibility by e. g. taking a lead in product development
- You'll be responsible for developing frontends for our products
- You'll learn new tools, languages, and best practices
- You'll write clean, composable and testable code

### REQUIREMENTS

- At least 5 years of experience in building user-focused web-interfaces with Angular
- You are passionate about working in an international, cross-functional and agile team, sharing knowledge and building great products
- Comprehensive experience in modern cloud-application development
- Ideally, DevOps experience and profound Linux knowledge
- You understand that UI/UX are important for delivering a successful product
- Profound English skills mandatory, German skills nice to have

### BENEFITS

free choice of location and working hours

start up with the benefits of an existing customer base

opportunity for personal development and shaping the company

team with dedication for world class software

high end IT hardware available

yearly budget for personal and technical development

30 days of vacation
